

FirstPROOF v4.0

If you are upgrading to FirstPROOF v4.0 from an earlier version of FirstPROOF v3.x, then there are a few things you need to be aware of:

1. This is a chargeable upgrade and to run it you will need an Upgrade Key. If you have registered FirstPROOF in the last 12 months (after March 1st 2006), then you should be eligible for a complimentary Upgrade. Please contact your supplier for details.
2. Version 4.0 can read all the configuration settings from earlier versions of FirstPROOF. However, this is a one-way process (earlier versions of FirstPROOF clearly know nothing about v4.0).
3. There are a large number of changes in version 4. We therefore recommend that you at least read the Release Notes.

If upgrading to FirstPROOF v4.0 from an earlier release, please read the documents “FP v3.x README”.

If you ever have any suggestions as to improvements, or feedback on the product (good or bad), please do let us know at suggestions@hamillroad.com or feedback@hamillroad.com, as we really do like to hear from you and will add in things that get suggested.

We hope you enjoy using our s/w, that it makes you more productive and saves you lots of time and money.

Best Regards,

Hamillroad Software.
