

# **FirstPROOF 6.1**

## **Upgrades**

If you are upgrading to FirstPROOF 6.1 from a previous version of FirstPROOF, then there are a few things you need to be aware of:

1. This is a chargeable upgrade and to run it you will need an Upgrade Key. If you have registered FirstPROOF in the last 12 months (that is any time during 2013), then you should be eligible for a complimentary upgrade. Please contact your supplier for details.
2. Version 6.1 can read all the configuration settings from earlier versions of FirstPROOF. However, this is a one-way process (earlier versions of FirstPROOF clearly know nothing about version 6.1).

If upgrading to FirstPROOF 6.1 from an earlier release, please read the documents “FP v5.2.0 README”.

For anyone with a curious mind, FirstPROOF 6.0 was only released for our OEMs who embed our technology into their own workflow; that is there was no FirstPROOF 6.0 release, just a Viewer 6.0 release.

## **Supported OS's**

As of FirstPROOF 6 we are dropping support for older operating systems and CPUs:

1. Windows NT, Windows 2000, and Windows Vista are no longer supported (XP is).
2. Mac OS9 (or earlier) is no longer supported.
3. Mac PowerPC based computers are no longer supported.

Furthermore, we are stopping all official support for versions of FirstPROOF older than 5.2. We will provide support for FirstPROOF 5.2, but if any issues encountered are things that are broken in FirstPROOF 5.2 but work in FirstPROOF 6.1, then the solution will be to upgrade to FirstPROOF 6.1.

## **Mac OSX compatibility**

FirstPROOF 6.1 on the Mac does NOT support OSX 10.9 (Mavericks). Certain functionality, specifically interacting with the Harlequin RIP does not work; however, we are re-writing these parts of our code and have a 6.2 release planned around the end of February.

If you ever have any suggestions as to improvements, or feedback on the product (good or bad), please do let us know at [suggestions@hamillroad.com](mailto:suggestions@hamillroad.com) or [feedback@hamillroad.com](mailto:feedback@hamillroad.com), as we really do like to hear from you and will add in things that get suggested.

We hope you enjoy using our s/w, that it makes you more productive and saves you lots of time and money.

Best Regards,

Hamillroad Software.
