

FirstPROOF v4.0.2 Release Notes

The 4.0.2 release of FirstPROOF is a minor (but critical) update containing a number of important bug fixes, along with one change to the Measurement Tools functionality/option.

1. Changes and Fixes To FirstPROOF:

1. A number of issues relating to the new Thumbnail View and Down Sample Server have been fixed.

2. Changes and Fixes To FirstPROOF Std:

n/a

3. Changes and Fixes To FirstPROOF Pro:

1. A new Barcode Measurement Tool has been added. This can be used to read/verify an EAN/UPC-A barcode; as well as reading the actual barcode itself, the checksum digit is calculated and shown (against the last digit read from the barcode). In addition, the Bar Width Reduction (BWR) factor and barcode size (which should be between 80% - 120%) are also calculated and shown.

4. Mac Changes and Fixes:

n/a

5. PC Changes and Fixes:

1. All the PC dialogs have been tidied up so that they are consistent (in terms of size, layout, spacing, etc...).

6. Other Changes and Fixes:

n/a
