

## **FirstPROOF v4.0.1 Release Notes**

The 4.0.1 release of FirstPROOF is a minor (but critical) update containing a number of important bug fixes, along with one change to the Printing functionality/option.

### **1. Changes and Fixes To FirstPROOF:**

1. A number of crashes have been fixed.

### **2. Changes and Fixes To FirstPROOF Std:**

n/a

### **3. Changes and Fixes To FirstPROOF Pro:**

1. Print View has been replaced by Print Best [Fit]. This is more what users expect and prevents the “lots of pages being printed” problem with the previous Print View when viewing at large zoom factors.

### **4. Mac Changes and Fixes:**

1. All the Mac dialogs have been tidied up so that they are consistent (in terms of size, layout, spacing, etc...).

### **5. PC Changes and Fixes:**

n/a

### **6. Other Changes and Fixes:**

n/a
