

## **FirstPROOF v5.0.3 Release Notes**

The 5.0.3 release of FirstPROOF is a minor (but critical) update containing a number of important bug fixes (mainly relating to viewing of LEN files and use of Color Management).

### **1. Changes and Fixes To FirstPROOF:**

1. Added reporting of Flate compressed LEN files to the Info window - as "LEN(F)".
2. Fixed a potential memory leak with LEN files under certain error conditions.
3. An issue reading certain types of LEN files (with optional parts) has been fixed.

### **2. Changes and Fixes To FirstPROOF Pro:**

#### **Dot Gain:**

1. A bug with the dot gain tool with a dot gain setting greater than 1.5 and a negative job resulting in inverted output has been fixed.
2. The application of a dot gain set when all colorants are disabled has been fixed.
3. Fixed export of dot gain data to use given (default) name.

#### **Color Management:**

1. Disallowed editing of spectral data when viewing (to prevent non-synchronized use).
